Examples of problems and malfunctions <ul style="list-style-type: none"> • There is a burning smell • Water or a foreign object has gotten inside → Immediately request repair from the place of purchase or the installer. • Request installation from the place of purchase or an installer. <ul style="list-style-type: none"> – Not doing so may cause electric shock or ignition.

CAUTION

- Do not stand on an unstable surface when operating or checking the adaptor.

– This can cause injury from falls.

System Overview

Before Installing the Adaptor

- The Network adaptor (adaptor) is designed specifically as a terminal for the Panasonic AQUAREA Smart Cloud. Panasonic AQUAREA Smart Cloud cannot be accessed with any other adaptor.
- Do not attach the adaptor to metal as wireless performance will be adversely affected. Use the wired connection if you have no alternative.
- We recommend you use Google Chrome as your Internet browser.
- Google Chrome is a registered trademark of Google Inc.

Parts Identification

No.	Item	Description
1	Power LED	Indicates that the adaptor is being supplied with power.
2	Status LED	Indicates the status of the adaptor. Blue: Wireless mode Green: Ethernet mode Red: Abnormality White: Timer
3	Link LED	Indicates the communication status of the adaptor.
4	WPS switch	Switches WPS ON.
5	Register/Reset switch	Enables user registration and resetting.
6	Check switch	Check the communication status of the adaptor. Switches between Ethernet and Wireless modes each time it is pressed and held for 10 seconds.

Connecting Network

You can establish a connection with the internet with either the Ethernet mode (wired) or the Wireless mode (wireless).

1 Turn on the power supply to the indoor unit.

- The Power LED lights.

2 The colour of the Status LED indicates the connection mode.

■ When connecting using the Ethernet mode (wired)

1 Check the Status LED is green to confirm that the Ethernet mode is on.

- If the Ethernet mode is not on, press and hold the Check switch for 10 seconds to switch to the Ethernet mode.

2 Connect the router and the adaptor with a LAN cable.

- The Link LED lights to indicate that the connection has been established.
- Use a shielded LAN cable.

■ When connecting using the Wireless mode (wireless)

1 Check the Status LED is blue to confirm that the Wireless mode is on.

- If the Wireless mode is not on, press and hold the Check switch for 10 seconds to switch to the Wireless mode.

2 Switch on WPS on the router.

3 Press the WPS switch on the adaptor.

- The Status LED and Link LED light when communication is established.

Starting "AQUAREA Smart Cloud"

Use a smartphone to set up the AQUAREA Smart Cloud.

- User interface image may change without notification.

1 Access the "AQUAREA Smart Cloud".

<https://aquarea-smart.panasonic.com>

- There is no charge for using this application. Other charges may be incurred for connection and operation, however.
- Updates to the service may mean there are changes to the design of the screen and display.
- You will need a Panasonic ID in order to use the application. If you have not yet registered, first obtain a register for a Panasonic ID (free) by either following the link on the login page or at the following URL.
<https://csapl.pcpf.panasonic.com/m>

AQUIREA Smart Cloud
