warranty

Water heaters with electronic control and a knob for adjusting the water temperature.

### Most important advantages

#### Electronic control

- energy and water savings through smooth power modulation
- precise and comfortable temperature regulation in the range of 30-60°C

#### 4 power levels in one water heater

- option to select maximum power (except for 27 kW model)

#### 4 power levels in one water heater

- water temperature up to 60°C on the supply

#### Easy replacement of the old heater with a new one

- specially designed PPE4 housing equipped with a unique hanger allows for easy installation of the heater in the place of the old one.

### Applications

from 10kW

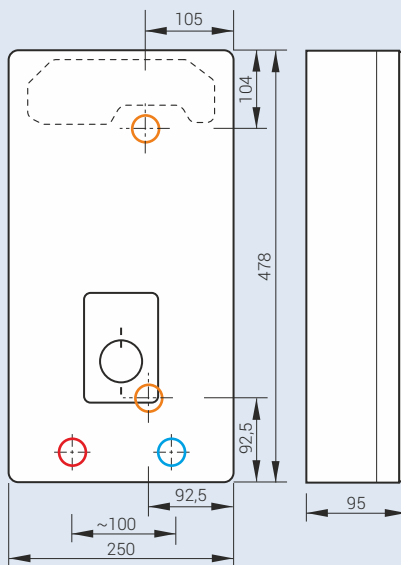

from 12kW

from 18kW

### Dimensions

The special hanger facilitates the installation of PPE4 in the place of the old heater of any brand.
