

Zehnder ComfoAir Flex 350

Technical specification for ceiling mounted ventilation unit

always the best climate

General

The Zehnder ComfoAir Flex has been developed as an ideal solution for apartments and small dwellings, where an efficient use of space for living is important. Thanks to its compact design with minimal dimensions of 1068 x 868 x 327 mm (L x W x H), the Zehnder ComfoAir Flex enables space-saving installation in suspended ceilings for a harmonious integration into any apartment.

The Zehnder ComfoAir Flex delivers an impressive performance with air volumes up to 350 m³/h at an external pressure of 200 Pa, to guarantee a comfortable and healthy indoor climate. Additionally the innovative ventilation unit from Zehnder is fitted with what have been proven to be the quietest fans on the market in their size. Even during full operation, the residential ventilation unit convinces with low casing radiation which provides an incredibly quiet noise level for more comfort in your home. In conjunction with the custom made heat exchanger, it is possible for our ceiling mounted unit to achieve an excellent energy efficiency with very low electric consumption.

Due to high quality components which are custom made to work together in harmony, the ComfoAir Flex enables an efficient, reliable and durable operation. With the enhanced filter concept with standard ISO coarse ≥ 65% (G4) filters for supply and extract air and the optional ePM1 ≥ 55% (F7) filter, the Zehnder ComfoAir Flex can deliver pollen free fresh air. Moreover the filter replacement is always at the right time, due to a time and flow based filter alert.

Top Benefits

- The best automatically adjusted indoor climate all year round guaranteed by the Climate Switch® technology.
- Reduces pollutants entering the home: enhanced filter concept filter for supply of clean fresh air into your dwelling.
- Space-saving installation in suspended ceilings for a harmonious integration into any apartment due to its minimal dimensions of 1068 x 868 x 327 mm (L x W x H).
- Increased comfort thanks to incredible quiet noise level even during full operation.
- An impressive performance in a compact design with air volumes up to 350 m³/h at an external pressure of 200 Pa to guarantee a comfortable and healthy indoor climate.
- High level of heat recovery combined with very low energy consumption: due to a custom made heat exchanger and the latest fan technology.

Zehnder ComfoControl App for commissioning and control

Zehnder ComfoSwitch C

Zehnder CO₂ Sensor C

Zehnder ePM1 filter

More Benefits

- Easy and convenient operation: built-in WiFi connection enables a direct control via the Zehnder ComfoControl App.
- Flexibility and security for planning and installation as one unit combines right and left orientation, which can be changed through the Zehnder ComfoControl App.
- Easy and flexible mounting on the ceiling, thanks to the 4 x 45 degrees turnable bends.
- Quick and easy commissioning by constant air flow with assistance via the Zehnder ComfoControl App which guides you through the steps.
- The double dry siphon included in the delivery allows an easy and enhanced installation of the ComfoAir Flex.

Flexibility

The Zehnder ComfoAir Flex impresses with an easy and flexible installation which allows trouble free mounting on the ceiling, due to the 4 x 45 degrees turnable bends and adjustable mounting brackets. Each air connection can be individually turned to connect to a duct inline with the unit, or rotated 90 degrees. For even more flexibility in planning and installation the right and left orientation is achieved through one single unit and can be changed with the ComfoControl App. This reduces installation time, and also reduces the risk of ordering the incorrect unit. Thanks to its ingenious design with focus on accessibility of components, the ceiling mounted ventilation unit is also easy to service and to maintain.

Compact configuration

- Can be mounted in suspended ceilings with a height of > 330 mm;
- Very compact solution - in combination with Zehnder ComfoWell 320 the system has a max. width of 966 mm;
- Condensate drain runs along the notch and does not increase the installation width of the unit, thanks to the unique and compact double dry siphon;
- 45 degrees turnable bends ensure the most suitable connection to the ductwork;
- Integrated inclination insures the correct condensation drainage angle, without increasing the build in height;
- Easy to install due to multiple solid mounting brackets;
- Supplied with 1.1 m cable and plug.

Technical specifications

Zehnder ComfoAir Flex 350	
Key facts	
Max. air volume	350 m ³ /h
Length	1061 mm - 1068 mm
Width	868 mm
Height	327 mm
Weight	38 kg
Installation	Ceiling installation
Main technical data	
Temperature range	-20 °C to +50 °C during transport and storage -20 °C to +50 °C moved air +7 °C to +40 °C in the installation room
Condensate drain (Ø)	32 mm
Air connection size (Ø)	160 mm internal
Supply voltage	230 V, 50 Hz
Maximum power consumption	1890 W (with preheater) 193 W (without preheater)
Current draw	8.87 A (with preheater) 1.48 A (without preheater)
Specific fan power	0.26 Wh/m ³
Cos φ	0.43 - 0.56
Sound power level Lwa	48 dB(A)
Other technical data	
Protection class	IP20
Housing	Sheet metal
Front panel	Sheet metal, RAL 9003
Inner zone	EPP / ABS
Heat exchanger	PS
ISO-classification	B
